

EXCEL QUALITY. IN PLAIN LANGUAGE.

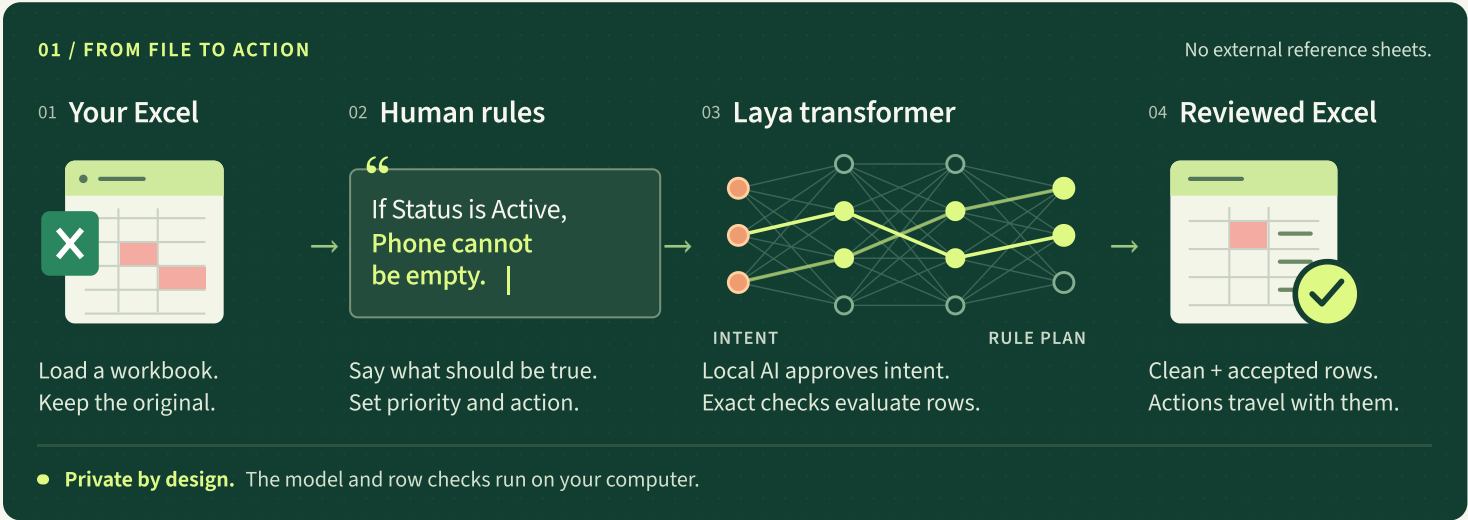

Your rules. Better *data*.

Turn everyday instructions into repeatable checks
and an Excel file your team can act on.

Less manual checking.
Fewer scattered formulas.
Clearer next steps.

You know the business.
Write the rule, not the code.

02 / ONE RULE, MADE ACTIONABLE

Illustrative mapping

“Active accounts need a phone. If Status is Active, Phone cannot be empty. Flag high priority and route to the Account Owner.”

TITLE	Active accounts need a phone
RULE	Status = Active and Phone is blank
FLAG	High priority
ACTION	Route to the Account Owner.

03 / EVERYDAY PROBLEMS. REPEATABLE CHECKS.

Your data. Your conditions.

 Missing data Empty cells or absent columns.	 Duplicate entries Repeated IDs or field combinations.	 Invalid formats Email, ZIP, dates and numbers.
 Field comparisons Values that should match or differ.	 Conditional rules If X is true, Y cannot be empty.	 Text & ranges Text fragments, values and limits.

You make the final call.

Grouped findings. One review per row.
Red error cells, priorities and action items in the export.

WINDOWS DESKTOP

Ready to run

Offline installer.
Portable build option.¹

For people who know their data. *Not code.*

AIDYN / PRODUCT BRIEF

Reviewed output, not automatic cell repair. Original values stay unchanged. Unsupported or uncertain rules need revision.

¹ Portable packaging is configured; the verified release is the offline Windows installer. Device resources are still required.
